

# Github Profile

DevFest 2021

## Description

Build a simple mobile application with a **super cool** user interface that interacts with the **Github API** and fetches the **public data** (The amount of data displayed will be considered) of a given **username** or **email address**.

## Technical specifications:

1. No 3rd party libraries.
2. Mobile Application.
3. Github [GraphQL](#) API.
4. At least display the public information + list of public repositories.

## Assets

- [GitHub GraphQL API](#)
- [Freepik: Free Vectors, Stock Photos & PSD Downloads](#)
- [Free vector icons - SVG, PSD, PNG, EPS & Icon Font - Thousands of free icons](#)
