

Count The Doodles

DevFest 2020

Description

Google Doodles are a tool on the company's homepage that are often used to highlight world issues, historic events, and celebrations around the globe.

The homepage for Google Search is one of the most-viewed web pages on the planet as it powers billions of searches on a daily basis. Right above the search box, though, Google's logo appears, and on occasion, it'll add something extra by using a "Doodle." These Doodles can be as simple as additions to the traditional logo but often go as far as completely redesigning Google's logo with artistic creations.

To pass the Challenge:

1. Use the google doodles API and your skills in Web Scraping to solve the challenge
2. Count the number of Google Doodles that had been made visible in Algeria in the period (01-01-2015 - 01-01-2020)

Further Hacking:

1. You can have fun playing with the Google Doodles API by getting the country with the most apparition in Google Doodles
2. You can also get the number of Google Doodles made in each year and get the year with the max number of Google Doodles

Hint

- The Google Doodles API returns JSON format, holding a list of doodles in the specified month, the doodle has a lot of information for this challenge you may be interested in the **countries** field that holds the countries in which this doodle is visible.
