# Create UI screens

DevFest 2020

Description

The first thing that every user notices about your app is your UI , so in order to attract more users you need to focus on the design.

In this challenge you will implement some clean beautiful screens.

To pass the Challenge:

1. Develop a mobile application which includes the two screens (check the assets).
2. Choose your favorite framework (**Not a prototype !)**

Hint :

1. Try to make it responsive and smooth.
2. Simple animation will be appreciated.
