Splash screen
DevFest 2020

Description

Do you know how we call those screens below 🤔 ?

Splash screen is a screen which appears when you open an app , which usually contains the application logo with a beautiful animation .

To pass the Challenge:

1. Choose a logo on your own (your own design or an existing logo).
2. Create a splash screen activity with your favorite framework (real application not a prototype).
3. You can't use a video (mp4...etc) or GIFS .

Hint:
- The key to pass this challenge is your degree of creativity (animation,background, colors...).
- Adding an animation would give you a huge advantage.
